

# Get your Automotive Certificate III Light Vehicle Qualification

Phone for your individual cost **03 9829 1126**

## Prove you meet the industry benchmark

Have your Light Vehicle mechanical skills and experience recognised by undertaking Recognition of Prior Learning (RPL) in the AUR30616 Certificate III in Light Vehicle Mechanical Technology.

If you are experienced in your trade and meet the eligibility requirements, the VACC Automotive Certificate III Program will recognise your expertise and benchmark your skills for the industry.

This year we have partnered with Chisholm Institute to provide Light Vehicle RPL assessment services.

When you undertake the RPL process, you prove your expertise by providing evidence to an Light Vehicle Assessor with long experience in the industry.

There are clear standards for relevant skills, and when you have the evidence required there is no need for training.

### HOW IT WORKS

1. We identify your skills during an initial consultation
2. We recommend the appropriate qualification
3. We provide information on the evidence to collate to prove your skills
4. We map your skills with the qualification requirements
5. We identify training gaps (if applicable), and provide flexible training options

We prepare your RPL application for the nationally recognised qualification

### REQUIREMENTS

- Must have extensive industry experience
- Must be an Australian citizen or permanent resident, residing in Victoria
- Must meet eligibility criteria
- Must complete the RPL process within 6 months

### COST

\$1699 - \$2700

*Subject to eligibility criteria*

### HOW TO APPLY

Phone for your individual cost: 03 9829 1126
