

# Ideas on how to use the videos

## APPRENTICE PERFORMANCE FEEDBACK

Ask all staff to watch the six videos (7 minutes in total)

Choose one of the topics to discuss at your tool box meeting

Agree on a goal for the week

Review each goal the following week

Select a new video to discuss at the next meeting

## SIX VIDEOS AND POSTERS

Each video is linked with its own poster. You can print these in A4 or A3 for distribution

Use the questions to guide discussion about the video and add your own questions if you want

One way of presenting them is to first complete the questions individually or in small groups and then feed the ideas back to the larger group

Try pinning the completed questions on the staff notice board for everyone to read

## CASE STUDIES

Discuss the examples given in the case studies and develop actions for good practice

How does each business handle the same type of issue?

Note how the behavioural messages are communicated consistently at every level of the business

## INDUCTION OF NEW APPRENTICES

Use the six videos as part of the induction process for new apprentices

Show the videos and talk about what each means for your business

Use the case studies to demonstrate how a successful apprentice works

Follow up with the apprentice weekly on how they have applied what they learned.
